

Intents III (Tabbed Windows)

- 1.** Edit your original project that contains SumActivity. Add a button to the initial screen that switches the user to a screen that has tabbed windows.
- 2.** Have the first tab invoke the SumActivity by class name, with no data.
- 3.** Have the second tab invoke the SumActivity by class name, with randomized “extras” data.
- 4.** Have the third tab invoke the SumActivity by URI, with no data.
- 5.** Have the fourth tab invoke the SumActivity by URI, with randomized URI parameters.
